

## NEWS RELEASE

### **Ingenico's New Payment Device for Unattended & Petro Payment Terminals Receives Certification Under Interac Association's Requirements**

*Highest level of security for automated fuel stations, unattended retail & convenience stores*

**Toronto, ON. May 10, 2010** – Ingenico, the #1 provider of payment solutions in Canada, announced today that Ingenico's new i9780UPT fuel and unattended device has received certification under Interac Association's requirements for security. Interac Association, Canada's leading payment network, sets the security standards for all terminal devices that are connected to this network and used by its members across the country.

According to the certification, the i9780UPT meets the strict Interac Association Chip Unattended compliance requirements, PCI PED and EMVCo L1 and L2 security standards.

The i9780UPT device is built as a full payment terminal for integration into island card readers. It accepts smart, contactless and magnetic cards and has an internal barcode reader to accept print or virtual coupons on cell phones. This rugged device offers a perfect alternative to existing terminals for outdoor payment in petroleum and unattended self-service applications.

“Certification of our i9780UPT device as a secure alternative to current fuel stations and outdoor payment solutions in Canada is the latest example of Ingenico's dedication to providing our Canadian customers and consumers with the highest levels of payment security,” said Christopher Justice, president, Ingenico, North America. “As the innovative leader in payment solutions, Ingenico takes a strategic approach to bringing new payment terminals into the market that are fully aligned with the needs of the local marketplace.”

The i9780UPT device is available for distribution in Canada as of May 2010.

#### **About Ingenico (ING)**

Ingenico (Euronext: FR0000125346 – ING) is a leading provider of payment solutions, with over 15 million terminals deployed in more than 125 countries.
