AutoPilot™, announces handheld extension of its Software as a Service (SaaS) Point Of Sale System

June 28, 2010 - Tamarac, FL – AutoPilot Carwash Control Systems, announced the launch of MobilePilot™, a handheld extension to its innovative ProfitPilot™ point of sale system, the only Software as a Service (SaaS) based POS system designed specifically for the carwash industry.

MobilePilot delivers the functionality of a full blown POS system and push button station in a compact handheld computer. Integrated credit card processing and receipt printing allow attendants to greet customers and process orders simultaneously. In addition, from a simple touchscreen interface and integrated keypad, employees can view and modify the tunnel pre-wash queue directly from the unit.

“The true power of the MobilePilot” according to Jennifer Pedrizzetti, President of AutoPilot, “is that it dramatically improves attendant efficiency at a Full-Serve carwash. Less labor is required to deliver superior customer service. And through its integration with our ProfitPilot POS, MobilePilot users can capture customer data, accept gift cards and washbooks, and even modify the tunnel queue right from their hand.”

The MobilePilot bundle includes the MC70 handheld computer with cradle, charger, and portable receipt printer with integrated card swipe, power supply, and MobilePilot software for \$3,995 with a \$39 monthly service.

Additional information on AutoPilot can be found at www.AutoPilotControls.com.

About AutoPilot Carwash Control Systems:

Created with a vision to leverage technological innovation to bring affordable and effective solutions to the carwash industry, AutoPilot is the only company utilizing a Software as a Service (SaaS) business model that enables it to deliver a state-of-the art point of sale system with their Profit Pilot POS, with a lower cost of acquisition and maintenance than comparable systems in the marketplace. Engineered for ease of installation and use, AutoPilot's complete family of carwash control systems are able to work independently or fully integrate with one another for maximum efficiency. The Simply Smarter Controls from AutoPilot Carwash Control Systems include WashPilot™ Carwash Tunnel Controller, ProfitPilot™ Point of Sale System, MobilePilot™ Handheld POS, Automated Pay Station, Gated Entry System, Pay-at-the-Pump Code System, and the MotorMinder™ Motor Control Center.
