

Air1[®] Chosen by Knight Transportation for DEF Needs

Today, Knight Transportation, a market leading truckload carrier, announced its choice of the Air1[®] brand of DEF for its nationwide fleet of trucks. It is Yara's guarantee of quality, uninterrupted supply via multiple sourcing concept and its strong distribution model via the Mansfield DeliveryOne network which made this a perfect fit for Knight's intake of new 2010 SCR trucks.

"Yara stepped up and delivered the full service DEF solutions demanded by Knight Transportation. The Air1[®] team really helped us get started with DEF and answer all the questions we have about this new product. They can also grow with us and help us meet our changing needs as our SCR fleet evolves," said Dave Jackson, CFO of Knight Transportation.

"I am extremely pleased that Knight has chosen the Air1[®] brand to supply its DEF needs nationwide", said Chad Dombroski, Yara's Director of Air1[®]. "Our inside knowledge of how to help fleets starting off with DEF will put them on track. Knight has been a long time leader in the truckload carrier market and continues to show its commitment to being a market shaper with its move to the efficient, clean emission SCR units."

New truck engine manufacturers will need to comply with the new emission standards imposed by the EPA that went into effect on January 1st 2010. Under the new regulations, most engine manufacturers have chosen the Selective Catalyst Reduction (SCR) system as the most efficient way to meet these standards. DEF, the operating fluid for SCR, is a non-toxic solution that transforms harmful NO_x emissions from heavy-duty diesel-powered vehicles into harmless water vapor and nitrogen. According to engine manufacturers, SCR combined with DEF improves overall fuel economy by approximately 5% compared to competing technologies, and achieves Nitrogen Oxide (NO_x) reductions in excess of 90%. Air1[®] is guaranteed to meet ISO 22241 guidelines and is Certified by the American Petroleum Institute (API).

About Knight Transportation

Knight Transportation, Inc. is a truckload carrier offering dry van, refrigerated, drayage, brokerage (on highway and rail) and dedicated services to customers through a network of service centers located throughout the United States. As "Your Hometown National Carrier," Knight strives to offer customers and drivers personal service and attention through each service center, while offering integrated freight transportation nationwide and beyond through the scale of one of North America's largest trucking companies. Knight provides high service levels to a diversified base of full-truckload shippers across a broad range of industries and freight types.
